# Hello Guten Tag Bonjour

## [En]

Carpets made from Antron® fibre make a sensible choice. They look better for longer and that is thanks to the high-performance characteristics of Antron® fibre.

Through a unique combination of materials and processes, Antron® fibres help carpet to resist the unfortunate stuff that happens to it every day. By using Antron® fibre to make their carpet, manufacturers can bring your projects long-term performance and lasting looks.

That's why, Antron® fibre has been trusted for over 40 years.

## [De]

Eine Entscheidung für Teppichböden aus Antron® Teppichfasern ist eine vernünftige Entscheidung. Antron® Teppichfasern sehen dank ihrer Hochleistungseigenschaften länger neu aus.

Durch eine einzigartige Kombination von Stoffen und Verfahren machen Antron® Teppichfasern Teppichböden beständiger gegen die alltäglichen Angriffe, denen sie ausgesetzt sind. Durch die Verwendung von Antron® Teppichfasern können Teppichbödenhersteller Ihren Projekten Langzeitleistung und dauerhaft gutes Aussehen verleihen.

Aus diesem Grund verlässt man sich schon seit über 40 Jahren auf Antron® Fasern.

## [Fr]

Les moquettes fabriquées à partir de fibres Antron® constituent un choix avisé. Elles conservent leur apparence initiale plus longtemps grâce aux caractéristiques hautement performantes des fibres Antron®.

Par le biais d'une combinaison unique de matériaux et de processus, les fibres Antron® aident la moquette à résister aux assauts qu'elle subit tous les jours. En utilisant des fibres Antron® pour réaliser leurs moquettes, les fabricants peuvent assurer à vos projets une performance à long terme et un aspect durable.

C'est pourquoi les fibres Antron® sont dignes de confiance depuis plus de 40 ans.

# fabulous fibres | fabulous faser

## [En]

Antron® fibres are engineered to provide performance across a wide variety of locations. Antron® fibres help to give carpet a long life, that's why you will find Antron® in the DNA of great carpet.

With a tighter and stronger molecular structure than regular type 6.0 nylon, Antron® type 6.6 nylon resists matting and crushing, while a hollow filament shape helps to minimise the appearance of dirt and soiling. In Antron® Legacy™ and Antron® Lumena™ carpet fibres, this shape is improved even further with a four hole filament for better soil hiding.

With Antron® Lumena™, the fibre is also solution-dyed, where the colour is part of the fibre itself, bringing ease of maintenance. Available in over 250 different colours, Antron® Lumena™ carpet fibres are lightfast and colourfast, and offer stain protection.

No matter what Antron® fibre you choose, you can be assured of the very best quality, because Antron® fibre is in the DNA of great carpet.

## [De]

Antron® Fasern sind für hohe Leistung in den verschiedensten Einsatzbereichen ausgelegt. Sie verlängern die Lebensdauer von Teppichböden – deshalb findet man Antron® im DNA hervorragender Teppichbeläge.

Antron® Polyamid 6.6 (Nylon) hat eine dichtere und festere Molekülstruktur als das übliche Nylon 6.0. Es ist daher verfilzungs- und druckbeständig. Gleichzeitig trägt die Hohlfaserform dazu bei, dass Schmutz und Flecken minimal sichtbar sind. Bei den Teppichfasern Antron® LegacyTM und Antron® Lumena™ wurde diese Form noch weiter verbessert. Die Einzelfasern mit je vier Faserhöhlräumen wirken verstärkt schmutzverbergend.

Die Fasern von Antron® Lumena™ sind zudem spinngefärbt, d.h. die Farbe ist Teil der Faser selbst, was die Reinigungsfähigkeit des Endprodukts steigert. Die in über 250 Farbtönen erhältlichen Antron® Lumena™ Teppichfasern sind licht- und farbecht und weisen einen Fleckenschutz auf.

Ganz gleich, für welche Antron® Faser Sie sich entscheiden, Sie können sicher sein, dass Sie höchste Qualität erhalten – weil Antron® im DNA hervorragender Teppichbeläge zu finden ist.

## [Fr]

Les fibres Antron® sont fabriquées pour garantir la performance dans une grande diversité d'endroits. Les fibres Antron® augmentent la longévité des moquettes, c'est pourquoi vous trouverez Antron® dans l'ADN des moquettes de qualité.

Avec une structure moléculaire plus serrée et plus résistante que celle du nylon de type 6 ordinaire, le nylon de type 6,6 Antron® résiste au matage et à l'écrasement, tandis que la forme à filament creux rend les taches et les salissures moins visibles. Dans les fibres de moquette Antron® Legacy™ et Antron® Lumena™, un filament à quatre trous perfectionne encore cette forme pour une meilleure dissimulation de la saleté.

Les fils Antron® Lumena™ sont en outre teints dans la masse et la couleur devient partie intégrante de la fibre, facilitant ainsi l'entretien. Disponibles dans plus de 250 coloris différents, les fibres de moquette Antron® Lumena™ se caractérisent par la résistance à la lumière, la solidité des couleurs et une protection anti-taches.

Quelle que soit la fibre Antron® que vous choisissez, vous avez l'assurance de la meilleure qualité, car la fibre Antron® est dans l'ADN des grandes moquettes.

[En]

With Antron® fibre, carpets can be created in many different colours, textures and constructions.

Richer, more vibrant colours, textures with real depth and unlimited design potential are used to create carpets of outstanding design and true clarity. Even lustre can be altered and with Antron® Brilliance, carpets are given greater colour depth and less glitter.

By choosing a carpet made with Antron®, you are not only selecting a fibre with exceptional performance, but also a fibre that allows designers to create inspiring floor coverings that help to alter the perception of interior spaces.

[De]

Mit Antron® Teppichfasern lassen sich Teppichböden in vielen verschiedenen Farben, Texturen und Teppichkonstruktionen herstellen.

Sattere, leuchtendere Farben, Texturen mit echter Tiefe und unbegrenztem Design-Potential dienen zur Herstellung von Teppichbelägen mit herausragendem Design und echter Reinheit. Selbst der Glanzgrad lässt sich ändern. Mit Antron® Brilliance erhalten Teppichbeläge eine größere Farbtiefe und weniger Glitzern.

Mit der Wahl eines Teppichbodens aus Antron® entscheiden Sie sich nicht nur für eine Faser mit außergewöhnlicher Leistung. Sie entscheiden sich auch für eine Faser, mit deren Hilfe Designer inspirierende Bodenbeläge kreieren können, die beeinflussen, wie Innenräume wahrgenommen werden.

[Fr]

La fibre Antron® permet de créer des moquettes dans une multitude de couleurs, de textures et de constructions différentes.

Des couleurs plus riches et plus vibrantes, des textures profondes et un potentiel de conception illimité entrent dans la création de moquettes d'une élégance et d'une clarté inégalée. Même le lustre peut être modifié et avec Antron® Brilliance, les moquettes bénéficient de couleurs plus intenses et de moins de brillance.

En choisissant une moquette fabriquée avec Antron®, vous choisissez non seulement une fibre dont la performance est exceptionnelle, mais également une fibre qui donne aux concepteurs de revêtements de sol l'inspiration nécessaire pour modifier la perception des espaces intérieurs.
